

August 5, 1952

Dear Seymour:

Thank you for your note of July 29. I'd heard about Walter Rosen from Nancy Ziebur and from Skoog. I hope we can arrange for him to further these studies, after he gets here.

In one of your papers you mention laboratory "glass"-ware made of polyethene which can be sterilized in the autoclave. I would be especially interested in centrifuge bottles and other containers of such a stuff. Can you tell me who makes and sells it?

We are planning to vacation in Eastern Quebec, and may very well drive through Halifax, as you suggested.

Sincerely,

Joshua Lederberg
